Hi Adam

This annual refresher training is required for those who have completed 24 or 40-hour HAZWOPER training or EPA's 24 Hour Safety & Health training. HAZWOPER certification is to be maintained with an annual 8 hour refresher class. This course is designed for general site workers engaged in clean-up operations (both voluntary and corrective action) at uncontrolled hazardous waste sites and emergency response activities which expose or potentially expose workers to hazardous substances and health hazards.

The target audience for this class is EPA employees who have exceeded a one year period since their last HAZWOPER training and who are now due to take the 8 hour refresher class, and who are being deployed to the Hurricane Harvey emergency response.

I do not have a list of attendees. However, Safety & Health Manager Kendra Mask (Gomez) has identified 16 EPA employees who currently require this training. We do not yet know which of these prospective attendees may be deployed.

This class was requested by Verne McFarland and Troy Hill.

Mike- I'm trying to finalize the paperwork for the 9/11 HAZWOPER training and management needs more details.

- Who is the target audience for this training?
- Do you have a roster of attendees?
- Who requested the class?

Thanks again.
